

MedStar Ride-Alongs and 911 Center Plug-In's Available

Want to ride-along with a true “high-performance” EMS System? Wonder what Field EMS Supervisors deal with on a daily basis? Have heard about Mobile Integrated Healthcare and Community Paramedicine, but curious about what it really is? Read about 911 Nurse Triage programs, but are skeptical about whether or not it is a real ‘thing’? MedStar Mobile Healthcare invites you to see these EMS system components first hand by scheduling observations or ride-alongs or 911 center ‘plug ins’ while you are in Fort Worth attending the Texas EMS Conference.

To schedule this experience, go to <http://www.medstar911.org/observer-ride-outs> and in the “Observer Affiliation” section, enter “Texas EMS 2019 Attendee”.
